Technical Experience

Web Developer Intern   October 2015 - Present

NYS Department of Health, Health Data NY Program   Albany, New York

- Created an department wide intranet, and an office specific intranet for better collaboration between employees
- Using JavaScript, CSS, HTML, and SharePoint users were able to upload files, share ideas and announcements, and search for other employees' room number, work number, and email.
- Implemented features that allowed users to post, share, and sync calendars and emails within the office specific intranet

Activity Weather   WIP - Android Personal Project

- Developed an Android app that determines if the weather is nice enough outside during the next 24 hours for any sport, hobby, or outside activity
- Tools used were Android Studio, Github, Photoshop, and Illustrator. Targeted for Android versions 16+, using both official and open source libraries

www.unibeck.xyz   WIP - Personal Website

- Created a website to showcase my development skills, career, and personal interest with responsive design in mind
- Built with AngularJS, HTML, and CSS using Brackets IDE
